COOKIE POLICY

What is a cookie?

A cookie is a simple text file that is stored on your computer or mobile device by a website's server. Each cookie is unique to your web browser. It will contain some anonymous information such as a unique identifier and the site name and some digits and numbers. Most websites you visit use cookies to improve your user experience by allowing the website to 'remember' you, either for the duration of your visit (using a 'session cookie') or for repeat visits (using a 'persistent cookie'). Cookies may be set by the website you are visiting ('first party cookies') or they may be set by other websites who run content on the page you are viewing ('third party cookies').

To learn more about cookies, visit www.aboutcookies.org or www.allaboutcookies.org

What do cookies do?

Cookies have lots of different jobs, like letting you navigate between pages efficiently, storing your preferences, and improving your experience of a website. Cookies make the interaction between you and the website faster and easier. If a website doesn't use cookies, it will think you are a new visitor every time you move to a new page on the site, for example, even after you "log in," if you move to another page it won't recognise you and it won't be able to keep you logged in.

Disabling cookies

It is possible to disable the cookies we use via your browser settings, although this may affect your experience of our website.

Implied consent

Continuing to use our website and services is deemed to provide the UK Spa Association with your implied consent to the use of cookies similar technologies for the purposes we describe.
